#### Radiance for AmigaOS

Next Generation Multimedia Suite

AmiWest 2014 25th October 2014

A-EON Technology Ltd is pleased to introduce Radiance the ultimate multimedia compilation for AmigaOS4.1.

Radiance is built around the powerful RadeonHD v2.4 graphic driver which incorporates hardware accelerated composite video which is capable of delivering HD video playback on supported hardware. The package itself includes a whole host of new software, utilities. contributions and multimedia content.

Numerous talented developers and artists have contributed to the Radiance package creating one of most feature rich productivity compilations for AmigaOS 4.1

- RadeonHD v2.4 driver with hardware accelerated composite video support and utilities
- New versions of Mplayer (v6.2) and DvPlayer Lite (vo.8) with yuv2 hardware accelerated video support
- New version of Mplayer-GUI (v1.53) with added AmigaONE X1000 support
- Workbench CANDI bundle (Composite Animated Desktop Images)

- Animated icons bundle
- Sketchblock Lite (v2.7) for Radiance - the ultimate 24-bit paint software for AmigaOS 4
- Fractals module for Sketchblock
- Personal Paint (7.3) for Radiance completely reworked and updated version for AmigaOS 4.1
- Video and animation collection
- Original music and boot sound collection
- Workbench backdrop collection
- Original artwork collection
- Original A-EON Poster collection
